**CyberCon Africa 2017**  
Cyber Crime | Cyber Espionage | Cyber Warfare

Following on the success of previous events we encourage you to attend the 5th Annual CyberCon Africa Conference taking place on the 16th & 17th October 2017 at Turbine Hall, Johannesburg, South Africa.

The extreme vulnerability of all sectors in Africa to cyber attack has called for public and private partnerships to strategically deal with all types of cyber threats: cyber crime, cyber espionage and cyber warfare. This two-day conference will bring together leading experts in all cyber threat fields across the following sectors:

- Government & State
- Manufacturing & Mining
- Retail & Consumer
- Financial Services
- Healthcare
- Telecom & IT
- Energy & Utilities
- Media

**EVENT THEME – SA UNDER ATTACK!**

We have obtained credible intelligence of an imminent large-scale cyber attack against key South African Government and private sector organisations, especially those which are considered critical infrastructure. We believe the attack is being orchestrated by a well-funded foreign terrorist organisation with a view to extorting money from us. Will we be held to ransom?

The attack will take place in three days. We only have two days to prepare and call on all cyber security stakeholders and sectors to assemble for a tactical session to:

- Receive our threat intelligence feeds to the Intelligence Agency
- Understand the intelligence attack vectors that we need
- Identify a response to cyber attack and coordinate the cyber security response
