

Hello Cyberwolves

In this edition, our Alpha Wolf, Craig Rosewarne, shares his wisdom and career guidance for "Young Guns and Old Bulls" in the Cybersecurity sector.

It takes time to map out our interests and aspirations when establishing a career in cybersecurity. Maintaining and developing our work experience, qualifications, and certifications is essential, which are critical building blocks in becoming well-rounded cybersecurity professionals.

Additionally, as cybersecurity professionals, we need to consider the potential cyber threats and the behavioural and cultural ramifications of distasteful misconduct and sextortion that can happen to our colleagues, friends, and family. Perpetrators of sextortion often get away with it because victims would rather pay, keep quiet, or take their own lives than report this crime.

Cyber threats leave no physical bruises with huge financial, logistical, and reputational ramifications. Do not suffer in silence. Your story matters.

Yours securely,

NEWS

Our Alpha Wolf, Craig Rosewarne shares his wisdom and career guidance for Young Guns and Old Bulls in the Cybersecurity sector. Unbeknown to many graduates who mostly learn about coding or Information Technology (IT) at university, the cybersecurity field is massive and offers a great career opportunity for those willing to invest in it. The cybersecurity industry remains a promising growth area. [READ MORE](#)

Sextortion: Man uses ex-lover's nudes as ransom to demand sex in Bulawayo. A woman from Mpopoma suburb in the city has been plunged into a tough time

because her ex-lover, who refuses to be dumped, uses her nudes to demand sex from her while threatening to post them on social media platforms if she denies him sex. [READ MORE](#)

When does sexual harassment become a cybersecurity threat? Far too often, the crucial flaw that undermines a company's "insider threat" programme is not a lack of technology; it is insufficient vision. This is why security staff need to get involved in preventing, interdicting, and recovering from sexual harassment, assault, and boorish interpersonal conduct problems. [READ MORE](#)

TRAINING HIGHLIGHTS AND THREAT INTELLIGENCE BULLETIN

If you missed the Live Fire Incident Response and Threat Hunting Training (2 and 3 August 2021) here are some highlights to summarise this session. We received wonderful feedback from the delegates that attended the training. At Wolfpack, we are always pleased to hear how the delegates benefitted from the two-day training course. Huge thanks to everyone that attended the training and for your valuable feedback:
