**Dear Friends and Colleagues,**

As we wind down to spend a well-deserved holiday with our loved ones, it is always good to take stock of 2022 and consider the goals you wish to achieve in 2023. What a year this was – some of the key news events that stood out for me are as follows:

- The world population officially reaches 8 billion.
- Russia invading Ukraine – Resulting in a massive spike in global food and oil prices.
- Adjusting to the “new normal” of life after the COVID-19 pandemic.
- 2022 FIFA world cup in Qatar – Plenty of surprise results as the underdogs shine.
- The highest levels of load-shedding in South Africa – Plunging our country into an energy crisis.

- Political uncertainty in SA's leadership with the Ramaphosa Phala Phala drama.

As much as we like to believe we are in control of our lives and what happens in our organisations, we are very much at the mercy of macro-level under currents. Everyone is impacted, and the most vulnerable around us are hit the hardest. The exact same scenario applies to the growing plague of cybercrime running rife in our communities. Despite pockets of competence on our continent, our strategic and tactical response to this problem is largely ineffective. All is not lost, however; stay tuned for a number of exciting updates we will be making in 2023. As cyber defenders, we have a tremendous responsibility to protect our country, company and the community entrusted to us. Find your pack and partner to make a difference.

Stay safe,  
Craig Rosewarne
