

Hello Cyberwolves

The internet is a remarkable tool for sharing information, or it can be a harmful instrument for spreading infections. The global challenges we are all facing are that our people, processes and technology being compromised in one way or the other. Just as the world has seen a rapid transmission of COVID infections, so has business experienced the ever-increasing effects of Business email compromise (BEC), and ransomware which have undermined our economy and disrupted our daily lives to different extents. Let us rather focus on what we can control and then there is a good chance we can avoid being compromised.

Keep well and warm.

NEWS

US cyberwarriors are spread thin by ransomware attacks

The cybersecurity industry is stretched thin. Ransomware attacks are now so prolific that some companies simply cannot help every newly hacked victim get back online. And a shortage of workers means no immediate help in sight. Read more [here](#).

Where does your personal data go when you register for a Covid-19 vaccine in South Africa?

Concerns around South Africa's

Electronic Vaccination Data System (EVDS) for Covid-19 have simmered since its launch on 16 April. "We live in a time where cybercrime is prominent globally. The kind of info that is collected on the EVDS, if it falls into the wrong hands, could potentially cause a lot of damage," says Darelle van Greunen, director of the Centre for Community Technologies (CCT) at Nelson Mandela University. Read more [here](#).

2021 Public Policy Series Report

If you have not already downloaded the 2021 Public Policy Series report, we invite you to do so. Our MD Craig Rosewarne shares his insightful and inspiring contribution on page 15, 16 & 17, where he states that that cybersecurity is a vital issue for mobile money providers. To read the report click [here](#).

COMMUNITY

Do not be a victim of business email compromise. Protect your organisation this month. Be advised that anyone may be a target of this attack. Perpetrators have successfully scammed many people using BEC. Be wary of all emails you receive. Always call before authorising a transfer, check and check again. Herein is a Business Email Compromise Survival Guide to help protect against BEC. Avoid being compromised!
