## Hello Cyberwolves

We dedicate this month to our youth.

As the workplace has moved into our homes, so have many new critical risks. In today's connected world, our youth has more access to offensive and inappropriate content, which is easily accessible. Let us work together to preserve and protect their innocence against such content. We can make a lasting impact on our youth by educating and empowering them to feel safe enough to enjoy their youth, and strong enough to do the right thing.

## NEWS

When it comes to financial services companies, dealing with risk is a critical aspect of their daily business. As regulations worldwide have tightened control over financial institutions, compliance with these rules and the newer privacy laws also place a major burden on these companies. ---

# COMMUNITY

Let us preserve and protect our youth's innocent minds and hearts by guarding them against offensive and inappropriate content. Viewing this type of content may have a lasting impact. Let us take time to educate the underaged about what this content is and the consequences of viewing it. If it makes them uncomfortable, it is inappropriate.
