
Wolfpack Logo Update 2020(Red)(Hi-Res)

Wolfpack Information Risk provides specialist information and cyber threat consulting, training, awareness and incident support services to African governments and organisations.

WOLFPACK CARES. We are passionate defenders of communities, companies and countries against cyber threats.

Greetings Cyberwolves

The future of any country is determined by how well they educate and empower their youth.

This year marks the 46th anniversary of the 16th of June 1976 youth uprising in Soweto, commemorating the struggle our youth endured to achieve liberation. This struggle profoundly changed the socio-political landscape in South Africa. We would like to acknowledge the lives lost whilst celebrating our youth this month.

Let us walk the talk and be part of their journey by demonstrating the importance of cyber skills transfer, awareness, education, and mentorship. We can help build responsible, resilient young adults who can easily overcome cyber obstacles.

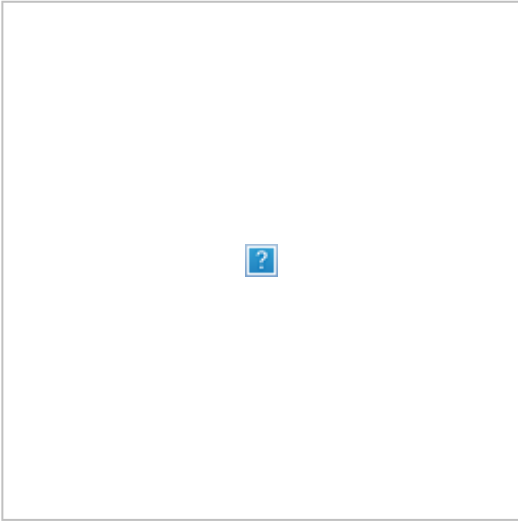

Do not wait for Youth Day to be a role model because today's youth are tomorrow's leaders.

We were delighted to be a sponsor at this year's ITWeb Security Summit. It was wonderful to catch up with our fellow cybersecurity colleagues in the flesh. We look forward to keeping in touch.

Yours Securely

#protectioninthepack

ADVISORY & CYBERSECURITY

Ransomware ring claims attack on Africa's largest retail chain Shoprite.

RansomHouse, a ransomware gang, has claimed responsibility for the cyberattack on Shoprite, Africa's largest retailer.

CISO & Ed Cartoon 5 Security Checklist

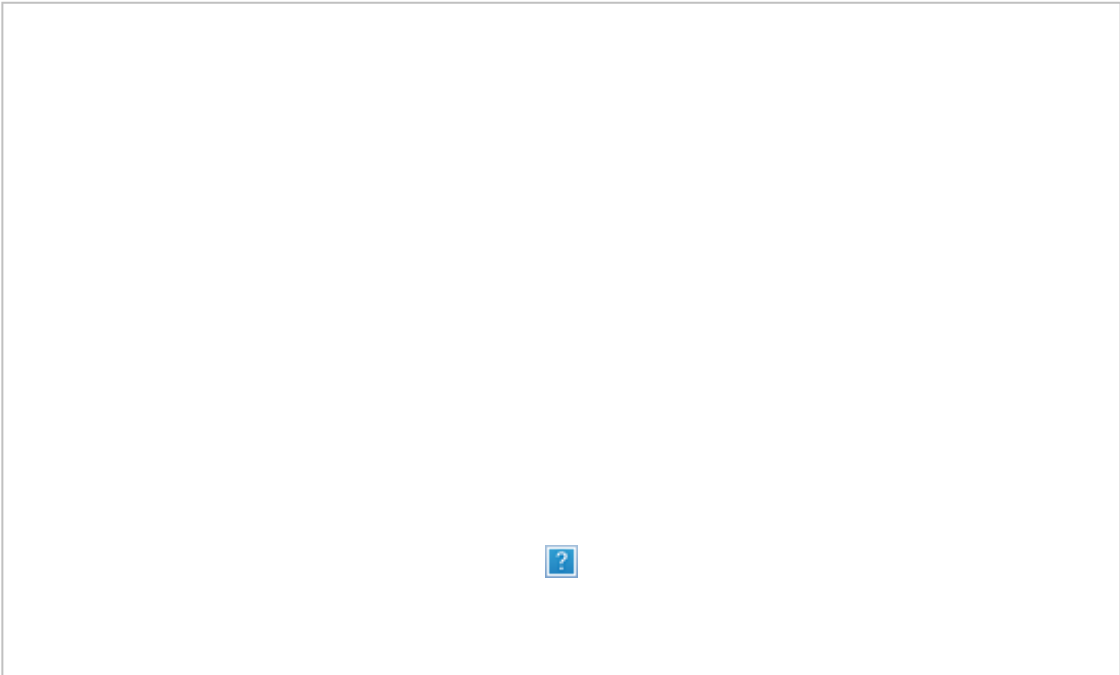

The Adventures of CISO Ed & Co attempts to highlight the everyday frustrations, heroism, and insights of CISOs and infosec teams while bringing some fun to the serious business of cybersecurity. We hope CISO Ed & Co. brings a grin to your face as you go about your day. **Compliments of Balbix**

The Journey of a CISO is a relentlessly stressful job. Security researchers have warned of "increasing and unsustainable stress levels" in the cybersecurity workforce resulting from persistent ransomware threats and looming, large-scale attacks, pushing security professionals to abandon the industry altogether. **Read more**

Don't despair; Wolfpack is here to help. We are passionate defenders of communities, companies and countries against cyber threats. We keep our fingers on the pulse when it comes to cybersecurity, privacy and resilience. Wolfpack can help you prevent, detect, respond, and recover from cyber incidents. **Watch here**

TRAINING, AWARENESS & RESOURCING

Offensive and Inappropriate content has such a negative impact on society. Many lives have been destroyed and even lost because of it. This video highlights a few of the many side effects of being exposed to such content. [Watch here](#)

Information is a valuable asset that can make or break your business. When information is properly managed, this allows you to operate with confidence. Information security management gives you the freedom to grow, innovate, and broaden your customer base in

the knowledge that all your confidential information will remain that way.

ISO/IEC 27001 is an internationally recognised excellent framework that helps organisations manage and protect their information assets to remain safe and secure.

Wolfpack is proud to be a British Standards Institution (BSI) associate consultant for the ISO 27001 and ISO 22301 standards. We have completed several successful ISO 27001 engagements to date. Wolfpack has deep experience and skills in implementing Information Security Management Systems (ISMS), including consulting, gap assessments, and remediation assistance to obtain certification. This is a major step toward providing evidence that an organisation has taken action to reduce its exposure to cybersecurity risks.
