
The Howl

October 2020

"The wolf howl is a distinct call to action for the pack over vast distances or to summon members when attacked."

Greetings cyber wolves

This week's theme: **Protecting your apps**

Free download below. Security awareness is **a team effort** - please do your part this week - you may help someone avoid much suffering!

Cool Tech

CleanPod is an essential tool in protecting yourself against the invisible germs lurking on all the objects you touch at home or outside. With a press of a button, a high-energy beam of UVC (ultraviolet C) light is emitted from the specialized LEDs, effectively sanitizing surfaces without the use of chemicals. In 30 seconds, UVC light can kill up to 99.9% of germs that get in its way.

Unlike conventional UVC lamps, CleanPod LEDs contain no mercury, and power on immediately without any warmup time – and they're precisely engineered to output UVC light at peak germicidal wavelengths.

Vox Cybersecurity Portal

As cybercrime increases both in South Africa and across the world, it is becoming increasingly problematic for SMEs to secure themselves. However, cyber risk management doesn't have to be complicated and costly. Introducing an easy-to-use platform to help manage cyber risks facing your organisation and track your improvement progress.

The Vox Cybersecurity Portal features:

- Business toolkit
- Training
- Simulated attacks
- Reporting dashboard

The Vox Cybersecurity platform is simple to set up and use, runs in the Cloud – so no hardware is needed – and is available at a low monthly cost. It is way more cost-efficient than any other solution currently available in the country.
