Cyber Security Community Update

September 2017 - New hands-on cybercrime training / Cyber security news

HAPPY SPRING

Dear Reader

As the days heat up, so do the amount of cyber attacks. **It only takes one click to fall victim to a cyber attack.**

To keep you alert and cyber aware, within this newsletter we have included two cyber events and the September Cyber News.

Yours Securely

The Wolfpack Team

In This Edition:

[CyberCon Africa](#)

[SecureJohannesburg](#)

- News [Update](#)

- Scam [Alert](#)

- Wolfpack [Training](#)

Watch this space as we prepare to keep you aware this upcoming **National Cyber Security Awareness Month.**

Remember, cyber security awareness

Events of Interest – CyberCon Africa & Training

NW3C International Cyber Training now in SA

The National White Collar Crime Center (NW3C) has provided training and technical assistance in the areas of **cybercrime**, **financial crime** and **intelligence** analysis to US law enforcement for nearly **40 years**. Following the CyberCon Event, NW3C will be running the following hands-on courses **for the first time in Africa**:

Identifying and Seizing Electronic Evidence

18 October 2017 (1-day course)

R6 497 per person excl. VAT (discounted introduction price)

This course introduces the information and techniques professionals need to safely and methodically collect and preserve electronic evidence in a forensically sound manner. The training focuses on the following elements:

- Being prepared to seize items of evidentiary value.
- Identifying sources of electronic evidence in a wide variety of devices.
- Preserving electronic evidence at the scene to ensure collection for later analysis.
- Best practices for the seizure of electronic evidence.

Social Media and Open Source Intelligence

19-20 October 2017 (2-day course)

R11,053 excl. VAT (discounted introduction price)

This course covers the skills professionals need to conduct successful online investigations involving social media. The training focuses on the following elements:

- IP address assignment; resolving domains and IP addresses; networking overview.
- Popular sites - Facebook, Twitter, KiK Messenger, Snapchat, Instagram, Tumblr, and more.
- Utilising open-source and commercial products to capture information, artifacts and crawl websites. Best practices for investigative user accounts.
- Using many different free open-source advanced search techniques, sites, and tools to help socially engineer and gather information. Participating in live demonstrations. (Requires Facebook, Twitter, and Instagram accounts).

Venue: SABRIC offices, Hertford Office Park, 90 Bekker Road, Vorna Valley, Midrand.

Date: 18-20th October 2017.

Special: If you **book for both courses**, you could **save R 1 941**. The total price for both courses would then be R 15 609 - this is really top value for a pair of hands-on courses with two experienced USA instructors. To top it off, all meals are included.

Events of Interest – SecureJohannesburg

SecureJohannesburg 2017 Conference

As cloud hosting, dev ops and the Internet of Things (IoT) take over the infrastructure on which economies are moving forward, the security risks continue to spiral out of control.

The (ISC)² SecureJohannesburg conference will address the key technical trends driving companies today. It will also present a unique forum for like-minded professionals to meet, exchange ideas and enhance the understanding of how to recognise and tackle security challenges which undermine progress today.

(ISC)² SecureJohannesburg provides the perfect opportunity for you to discuss and share common challenges, develop your network, and discover tools and tips that can be applied once you return to your workplace. We look forward to seeing you there!

Wolfpack Training

The Wolfpack Cyber Academy was created from a need to educate all levels of any type of organisation on the risks of not securing information properly as well as providing certification on the required standards and practices. The courses that we offer to the public, our clients and government departments focus on various areas of IT governance, risk, information security and cyber security. These courses vary in complexity and are tailored to suit any level of employee regardless of industry or organisation.

[Click here](#) to download our training catalogue. For any training enquiries please email: academy@wolfpackrisk.com

Wolfpack Personal Assistant Cyber Training

Personal Assistants (PA's) are a vital door opener within every organisation.

Furthermore, PA's are a key target for any malicious criminal. They often have access to sensitive information or credentials and the trust of their manager. A powerful combination that can provide the attacker with a significant windfall.

Wolfpack has a new cyber training course for PA's, named Personal Assistant Cyber Training (PACT). [Click here](#) to download the brochure.
